

OER Africa

(part 1)
Tony Lelliot

OER in support of Openness in Higher Education

Overview

Setting the Scene

- Too few learning resources for students and lecturers in African universities
- Many resources available are too expensive to be purchased by students, or even universities.
- Conversely, also many resources, including African ones, underutilised;
- Impossible to find a single resource that meets all needs for all time

Setting the Scene

- **Changing expectations of students (“clients”).**
- **Increasing diversity of students ... who are often more mature.**
- **Changes in HE point to need to access more, and more diverse, learning resources.**

What are OER?

This image is a resource

An **educational** resource

- What is the name of the bird in the foreground of the picture?
- Can you name 3 other varieties of this kind of bird?

An OER

- What is the name of the bird in the foreground of the picture?
- Can you name 3 other varieties of this kind of bird?

A Remixed OER

- The yellow hornbill shown left is one of four varieties of hornbills common across sub-Saharan Africa. The other varieties are the grey- and red- hornbills and the much larger ground hornbill.
- As the name suggests, the large horny bill is the key characteristic of the species. What does this suggest about their typical diet?

OER

- Open Educational Resources are teaching, learning, and research resources that reside in the public domain or have been released under an intellectual property licence that **permits their free use and repurposing by others**.
- OER include full courses, course materials, modules, textbooks, streaming videos, tests, software, and any other tools, materials, or techniques used to support access to knowledge. (Hewlett Foundation, [OER Defined](#))

The OER Concept

- Note the emphasis in the definition is ours, as we feel strongly that OER should:
 - be free
 - not require permission to use
 - allow new users to adapt and find new ways to use resources

Creative Commons

CC OER licensing

OER

Why use OER?

Transformative potential

1. Increased availability of high quality, relevant learning materials can contribute to more productive students and educators.
2. The principle of allowing adaptation of materials provides one mechanism amongst many for constructing roles for students as active participants in educational processes.
3. OER has potential to build capacity by providing institutions and educators access, at low or no cost, to the means of production to develop their competence in producing educational materials and carrying out the necessary instructional design.

(Butcher, CoL 2011: 13)

Welcome to the African Veterinary Information Portal (AfriVIP)

The African Veterinary Information Portal (AfriVIP) recognized the need to share its educational resources and research findings with veterinarians, paraveterinary professionals and students, stakeholders and to provide high quality Continuing Professional Development (CPD) training opportunities.

Our vision is to develop and sustain AfriVIP as a licensing framework as the authoritative and global online portal of information and create learning opportunities, resources, discussions about uniquely African veterinary and allied health will be achieved by drawing together the scientific capital, information and research and education through a dynamic and evolving network of Science working in Africa and further afield.

edX

The image is a screenshot of a web browser displaying the edX website. The browser's address bar shows the URL <https://www.edx.org>. The website's header features the edX logo on the left, followed by the text "Take great courses from the world's best universities". Below this is a blue button labeled "Find a Course & Start Learning". To the right of the text is a large, artistic image of a woman's profile with mathematical symbols and a globe in the background. Below the header is a horizontal bar with logos for MIT (Massachusetts Institute of Technology), Harvard University, Berkeley (University of California), and The University of Texas System. The main content area has a light blue background. On the left, there is a section for "edXDEMO101 | edX edX Demo" with a description: "A fun and interactive course designed to help you explore the edX learning experience. Perfect to take before you start your course." and a "LEARN MORE..." link. To the right of this text is an illustration of a person holding up a large puzzle piece, with other puzzle pieces forming a line. Further right is the "EDX COURSES" section, which states: "Our courses are designed to be interesting, fun and rigorous. They are the best courses, from the best professors, and the best schools and span a variety of subjects, from science and technology to the humanities. Take the new Demo101 course and see how rewarding online learning can be." Below this text is a blue button labeled "View all Courses".

How can we use OER?

- As with research, look for what already exists and see how we can add value: adopt, **adapt**, create?
- Employ same level of rigour as in selection of traditional resources – source, fitness for purpose, contemporariness, accessibility, licence ...

But

- It's not just about **information** literacy
- It's about **pedagogic** literacy

How does the resource **teach**?

- How will the resource fit into the way that you teach in your course?
- What are your underlying assumptions about how learning takes place?

Or possibly another question

- **What challenge to your teaching approach is offered in the resource?**

Possibilities include

- Mixing and remixing
- Adapting/ localising
- Translating
- Extracting
- Re-using/re-purposing
- Re-curriculating
- “Mobilising”

OER Africa

(part 2)

Neil Butcher

Why Openness in Higher Education

What are the Drivers?

- Historically disadvantaged students; many first-generation post-secondary students; likely to have received inadequate schooling
- Changing World of Work, due to technology
- Increasing unemployment rates amongst South Africa's youth
- Institutions under pressure to increase enrolments to accommodate demand for PSET

What are the Drivers?

- Explosion in collective sharing and generation of knowledge due to ICT; placing traditional role of educational institutions under pressure
- Concerted effort required to ensure that steps are taken to integrate marginalized students into ICT-enriched higher education environments
- Growing pressures on the time of academic and administrative staff to complete array of administrative tasks

What is open learning?

‘... an **approach** which combines the principles of learner-centeredness, lifelong learning, flexibility of learning provision, the removal of barriers to access learning, the recognition for credit of prior learning experience, the provision of learner support, the construction of learning programmes in the expectation that learners can succeed, and the maintenance of rigorous quality assurance over the design of learning materials and support systems’.

Open learning is **not a synonym** for distance education or e-learning or blended learning or resource-based learning or OER – these are all **important vehicles** for open learning but should **not be equated** with open learning

“Why do we still talk about classes and lectures/lecturers as the organizing metaphor for higher education?”

What do we need?

- Ethical intellectual leadership more than ever
- Scalable solutions to the educational backlog
- To break our obsession with lecturing as the primary budget line in curriculum communication
- A higher education that prepares people to thrive in perpetually uncertain times
- A social contract with students that reminds them of their responsibility to work hard BUT
- A contract that also commits the university to focus its resources on helping hardworking students to succeed
